

HIGH PERFORMANCE COMPONENTS

Timeless designs. Premium materials. Handcrafted in America.

1. DESIGNED IN HOUSE

End-to-end control for quality, performance, and fast iteration.

2. TOP QUALITY ACETATE

Cotton-based cellulose acetate, offering exceptional quality, durability, biodegradable, and an eco-conscious material.

3. MILLING

The slabs for the fronts are cut, planed, and nose pads bonded using high frequency to prepare for milling on the 5-axis machine.

4. TEMPLE CORE WIRE

Temple core wire adds rigidity and flexibility for shape retention and precise adjustments.

5. FOUR STAGE BARRELING

Frames tumble in birch and beech wood media- A week-long process that smooths, refines, and preps for polish.

6. HINGES & HARDWARE

Genuine rivets and anti-loosening screws—tested for 10,000 cycles—ensure long-lasting durability.

7. HAND POLISHING

The 4-stage hand polishing process provides a rich sheen that highlights the beautiful color of the acetate and quality of the material we use.

8. FINAL CHECKS

Our Quality Control process ensures each frame is thoroughly cleaned, carefully inspected, and ready to wear.
