Hunter®

01 | **Flexible design:** Modular options offer conventional wiring up to 23 stations, or choose fixed 6- or 12-station models

02 | **Two-wire compatible:** Enable hybrid two-wire control up to 32 stations with EZ-1 decoders

03 | **Smart water savings:** Solar Sync® compatibility provides automatic watering adjustments based on local weather conditions

PRO-C® RESIDENTIAL & LIGHT COMMERCIAL CONTROLLER

Simple programming, flexible station expansion, and optional two-wire capabilities make the user-friendly Pro-C controller the professional's first choice for residential and light commercial systems. When expansion isn't necessary, the fixed 6- and 12-station models offer affordability in a high-end residential controller.

Pro-C users can now add more stations than ever before, in the same compact package they've come to know and trust. Compatibility with simple and affordable two-wire control makes the Pro-C the perfect solution for light commercial projects such as business parks, city parks, schools, and multi-family housing complexes.

The Pro-C and all AC-powered Hunter controllers are EPA WaterSense approved when paired with a Solar Sync weather sensor. Solar Sync calculates evapotranspiration (ET) and adjusts Hunter controllers daily based on local weather conditions, resulting in maximum water savings.
