

# Ebbe PRO Drain Cover Installation & Removal Guide

IMPORTANT! Allow grout to cure for 24 hours before removing the Construction Plug

## Step 1 – Remove Construction Plug

- Push down on the center of the Plug 2-3 times to separate it from the grout
- Thread a screw into one of the four corner holes
- Pull up on the screw to remove the Construction Plug

## Step 2 – Install Drain Cover

- Remove any debris from inside the riser, and cover seat
- The Hair Trap should be positioned with the tines facing up
- Install the Pro Cover and push down until it's completely seated

## Step 3 – Removing Cover for Cleaning

- Thread the Pro Cover Removal Tool into one of the four corner holes
- Keep threading until the Cover disengages from the Riser
- Remove the cover
- Clean the Riser and Cover with any non-abrasive cleaner.
- Replace the Hair Trap if necessary
