

Finally, you can keep an eye on things.

RedVision. A new level of automation for your RV or 4WD.

THE POWER OF
REDARC

RedVision from REDARC is a Total Vehicle Management System which sets a new level of automation in the recreational and 4WD industry by bringing information and control right to your fingertips.

RedVision comes equipped with an in-vehicle mounted display and Bring Your Own Device 'BYOD' smartphone iOS or android app that enables the control and monitoring of many functions in a camper, caravan, motorhome or 4WD in one place.

Look at all the benefits...

- Switch devices on/off like lights, TV, electric steps, etc
- Monitor water and temperature levels and battery information
- Bluetooth connectivity to RedVision app from mobile device
- Modern, user-friendly interface
- Combines power protection, distribution and control

REDVISION

MADE IN AUSTRALIA

**GOOD
DESIGN
AWARD
WINNER**

Being on the road is great, and now it's even easier with the RedVision Total Vehicle Management System from REDARC.

Introducing a new level of automation in the caravan, RV and 4WD industries, RedVision is the ultimate solution in bringing information and control in one place.

Finally, it's easy to keep an eye on things when you travel.

Control

Turn devices on or off such as lights, an inverter, water-pump and any other loads like TV, electric steps, fridges and more. This reduces the need for multiple switch panels, which in turn allows for more storage space.

Additionally, RedVision is compatible with a range of REDARC products including Pure Sine Wave Inverters, In-vehicle Battery Chargers, Smart Start® SBI, and the 'Manager' range of Battery Management Systems.

Monitor

RedVision allows monitoring of six water levels, two temperature levels like ambient temperature or your fridge, and will monitor auxiliary battery usage and charging information when paired with a Manager30 or Manager15.

This means you can keep an eye on all the essentials in real time and keep on top of things before it's too late.

Automation

RedVision can be programmed to control multiple devices automatically and act as a master switch.

Simply hit one button and turn everything off and just leave the fridge running. Or when the vehicle ignition is turned on, everything turns off, but the steps can still be retracted.

All in one place

The display and app each incorporate modern, user friendly interfaces and easy to navigate systems, both of which encompass REDARC's expertise in innovation, continual investment into R&D and dedication to manufacturing quality products globally. The display is the main user interface for RedVision. The robust 4" colour LED display has been built and tested to withstand Australia's tough, rugged and varied environmental conditions.

It features soft key buttons on either side of the screen which can be programmed for multiple inputs.

Configure

Take full control of your device inputs, output channels and control logic using the new RedVision Configurator Smartphone App.

Visit redarc.com.au/redvision for product information.
